My 2 years of MCA at KLS GIT thought me many things like time management, logical and analytical thinking, improving my logical thinking by letting me to solve the problems on my own. The best thing is the practical method of teaching which helps in better understanding. With best infrastructure, laboratories and library we enjoyed learning. Pre-placement activities like alumni talk and aptitude training helped in placement exams. I'm grateful for being placed in TCS and Express Analytics. I heartily thank HOD and all the professors to make me realise my potential and guiding me throughout my course.
