

My journey of MCA at KLS GIT was very progressive. I got to learn various new technologies like BigData, Machine Learning, Django, MERN stack, R-programming etc. which helped me upskill and meet the Industry needs. The staff of MCA encouraged us to get out of comfort zone and work hard. We were fortunate to interact with College alumnis who are part of Industry which gave us confidence to crack Interviews. The MCA Curriculum is very Carefully designed which bases on over-all development of students. I am thankful to placement cell to organize more than 30+ Companies Interviews and I got placed with a decent Salary package.
