

Every one has a story inside her and here I, am to share a small journey of mine.

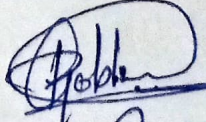

During the initial days, I felt little difficulty blending with the new surroundings. Because everything was new for me coming out of my comfortzone & studying outside. But when I got support from our faculties things got cleared. It's been a great pride for me to study at GIT, and all because of my Parents for being my biggest supportive wall, who supported my decision to study at GIT.

Throughout the journey, we had many ups and downs, Due to pandemic, initially when everyone was facing many difficulties still our professor worked so hard and made their new routes to teach us, so that their students should not sit idle at home, instead they should get their quality education.

The college has given me enormous opportunities to develop my skills, leadership quality, public speaking, practical thinking by taking part in many events.

I Thank my professor for being so supportive and constantly encouraging us, making us this confident enough to face upcoming challenges.

And special Thanks to my college, principal, HOD ma'am and my professor for providing such beautiful facilities and infrastructure to their Students.
